

WHAT IS IV DRIP THERAPY?

IV Drip Therapy infuses a liter of fluids with an extensive menu of essential vitamins, nutrients, minerals, and amino acids to provide hydration far beyond water alone. Many clients come in to get our IV Drip Therapy before they travel, which may help boost the body's natural defense system. Others like to schedule a Vitamin IV Drip to replenish their hydration and essential nutrients after sweating it out in our Infrared Sauna. Like to multi-task? Schedule your IV Drip session along with Compression therapy.

WHAT IS IV DRIP THERAPY LIKE?

Depending on your goals, with the help of expert guidance, you can choose from IV Drip Therapy that helps boost the body's defenses, gives your skin a youthful glow, or helps your athletic performance and recovery. Your IV Drip will take approximately 60 to 90 minutes, during which time you'll be relaxing in our comfortable IV Drip Therapy room.

WHAT ARE COMMONLY USED INGREDIENTS IN IV DRIP THERAPY?

A variety of IV Drip ingredients can help you achieve your personal wellness goals. From immune-boosting Vitamin-C to energy-boosting B-Complex, and so much more. Each month, find a new "Drip of the Month," a custom-made IV Drip Therapy option specific to your choosing. No matter what your Do More goal, IV Drip Therapy can help you take your health up a notch by replenishing your body and providing the fuel it needs to perform its best.

HOW OFTEN WILL I HAVE A TELEMED CONSULT WITH A MEDICAL PROFESSIONAL?

Customers will complete medical forms and a TeleMed consult with a medical professional during your first visit. After that, you will renew these requirements annually or more often as your medical history changes.
